Document Title2

Doc Writer

Version 1.0

2013-01-01

AsciiDoc is a lightweight markup language.

This is the optional preamble (an untitled section body), useful for writing simple sectionless documents consisting only of a preamble.

> **NOTE**　The abstract, preface, appendix, bibliography, glossary and index section titles are significant (*specialsections*).

First section

Document sections start at **level 1** and can nest four levels deep.

- Item 1

- Item 2

```
...
@ServerEndpoint(
value = "/matches/{match-id}",
decoders = { MessageDecoder.class },
encoders = { MatchMessageEncoder.class, BetMessageEncoder.class }
)
public class MatchEndpoint {
...

    @OnMessage
    public void message(final Session session, BetMessage msg,  @PathParam("match-
id") String matchId) {
        logger.log(Level.INFO, "Received: Bet Match Winner - {0}",
msg.getWinner());
        ...
    }

...
}
```
